

PE BACKER ROD

Polyethylene foam cord

Features:

- Allows for reduction of sealant and mastics
- CFC & HCFC free
- Does not rot
- Physically and chemically inert
- Low cost
- Quick and easy to install
- Non absorbent
- Comes supplied on a snag-free cardboard coil.

Uses

Texell Backer Rod, is a closed cell circular polyethylene cord, that is recommended for the use in a joint to provide a backing support to sealants and mastics, where a full depth expansion joint is not required.

Diameter	Box Quantity
